Universitas Dian Nuswantoro

S1 Informatics Engineering

EXPERIENCE

Web Engineer — TVKU (Internship)

Built and launched the public-facing landing page for TVKU's media platform, ensuring responsive design and performance. Also contributed to developing an AI-powered chatbot integrated into the platform.

Full Stack Developer — PT. Mekanikace Tunggal Mandiri

Executed end-to-end full stack projects at a software house environment. Additionally handled QA, business flow analysis, and UI/UX review across multiple client projects.

Full Stack Developer — PPRQ Annasimiyyah (Nasima Group)

Developed a multi-role ERP and web portal with User, Admin, and Super Admin access levels for managing pesantren operations. Also built the official website.

Outsourcing Developer — CV. Djavanese Autoparts

Took ownership of an existing custom internal system system built with Laravel, handling ongoing maintenance, bug resolution, and feature continuity to ensure stable day-to-day operations.

Lead DOSCOM

Led the largest open source community in Central Java, directing open-source technology research, Linux ecosystem exploration, and developer tooling initiatives across multiple collaborative projects.
